

## MYOB EXO tip of the week

Are you running EXO Clarity reports with the same parameters on a regular basis?

Did you know we can default your report parameters to reflect the same values every time?

*i.e. We could change the below report to default to **Order Accounts By: Name** negating the need for you to change it every time.*

We can also add more parameters to the report if you need them.

If you have any report parameters that you would like us to change or wish to discuss this option further please contact us on our Software Support number 211 3535
